RAM CARE

Tips for longer Ram Life and improving lambing percentages.

- Try to prevent rams becoming to fat. In Spring keep rams in small holding paddocks or sheep yards. (Obese animals cannot perform to their Maximum capacity)
- When shearing rams inject with Glanvac to prevent Cheesy gland affecting ram fertility.
- Feeding rams 4-6 weeks before mating with Lupins or Beans can increase their sperm Counts by up to 30%
- Check feet before mating, treat any rams with foot abscess with Antibiotics and trim feet if necessary.
- Always buy your rams from brucellosis free studs.
