# Warrawindi Bull Sale 2016

## WELCOME BACK TO WARRAWIDI

The Warrawindi team welcomes you to inspect this year's draft of high performance young Limousin bulls. Shalone Nobel Prize's progeny dominate the catalogue, with extra length, muscle and great calving ease.

Lot 1 is a star lot; our best CJS'L TIME TRAVELER son with tremendous growth and structure. He is our junior stud sire with 2 drops of impressive calves on the ground.

We have made the decision to offer six of our best young females, including a top B Bar Titanium daughter. All six are show prospect heifers and are from our leading female lines.

Another very busy year at Warrawindi, especially our big adventure taking a truck load of cattle to Rockhampton BEEF; it was a big learning experience on Australia's beef industry for all of us. The Heifer EXPO was another successful trip as we introduced a couple of new kids to the Heifer show this year, Georgie and Max Beighton. They had a great time and have since helped us out with showing events. We love seeing the improvement in these kids. Bentley's steer took out Reserve Champion while he won the Intermediate Achievement award. Mason's heifer won Senior Champion heifer while he won Senior Champion Handler and the Clipping Encouragement award. We are very proud of all their hard work. Can't wait to see what the future holds for these young people in the beef industry.

On the home front, there is no more grand kids to report on tally still sits on 5. Aimee and Tom after 8 years of courting have got engaged. She has also become a teacher and has a job!

Another highlight was Melbourne show, where we took out Reserve Champion Carcase as well as winning the Bull Calf Classic. We had the help of Liv and Ella, who kept the boys on their toes. Ella also has improved greatly with her handling, taking out Champion Handler a number of times and even beating the boys, which I think was her highlight.

Warrawindi's own Limo x vealers Av. 385kg and Av \$1184/head @ 9mths. We hope you can join us on the 25th of February and we thank you for your support and look forward to assisting your business in the future.

We are lucky enough to have the best job in the world,  
producing the best grass fed beef in the world.

# SALE INFORMATION

Thursday the 25th of February, 2016  
At Warrawindi 1371 Casterton Rd, Penola, SA  
Inspection from 1pm, sale starts at 3pm (SA time)  
Refreshments and nibbles provided after the sale.

## SA BEEF FIELD DAYS

Come along to our Beef field day on Monday the 8th of February.

## REBATES

A 3% rebate is offered to outside agents who meet the following conditions:

1. Introduce their client in writing to TDC of Penola by 5pm on the day prior to the sale.
2. Accompany and assist the client on sale day, unless prior agreement.
3. Settle within 7 days.

## INSURANCE

Animals will become the responsibility of the purchasers at the conclusion of the sale. We strongly recommend insuring your animals for 3, 6 or 12 month period at the conclusion of the sale.

Insurance can be arranged with TDC as required.

## DELIVERY

Free delivery to South Australia and Victoria.

## GUARANTEE

All animals come with a 12 month guarantee, if the bull proves to be infertile or incapable of natural service. Providing the problem is not caused by injury incurred since taking delivery. Any claims must be accompanied by a veterinary certificate.

## EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

**Horn Status:** (HP\*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, , (2P) Homozygous Polled by pedigree, (P) Polled, (S) Scurred.

**Colour:** (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not apricot).

**Protoporphria Status:** (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for protoporphria, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for protoporphria or have parents which have been tested normal or are free by pedigree.

**Homozygous:** is the term where an animal has two copies of a particular gene (tested or pedigree) for a trait (colour, polled). An example is Homozygous polled where by all progeny will be polled from that particular animal or Homozygous black where all progeny will be black.

**F94L:** (AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

# Warrawindi Bull Sale 2016

## SALE INFORMATION

### UNDERSTANDING THE SCURRED CONDITION IN POLLED CATTLE

Most calves that are horned can be identified at birth or shortly after, and almost always by weaning time. Distinguishing between smooth-polled and scurred-polled is more difficult. Scurs, a rudimentary horn growth, are often not seen until cattle are nearly a year old or sometimes even older. Scurs are usually blunt and rounded at the end, short for their diameter, and attached only to the skin.

Occasionally the scur will become solidly attached to the skull, particularly on bulls, when they are several years old. Scurred cattle should be classified as polled since they do have a polled gene. Only polled animals can express the scurred trait.

Scurs can only be seen in polled cattle. In horned cattle, the horn hides the scurred condition. So you can't evaluate the scurred condition in horned cattle. Not all polled cattle are free of scurs, it appears that only cattle that are heterozygous for the polled/horned genes (Pp) will express the scurred trait. Which means that both homozygous horned and polled animals will be free of scurs.

To emphasize the difference between scurs and horns, cattle should be classified as smooth-polled, scurred-polled or horned. Remember that all smooth-polled and scurred polled cattle have at least one gene for the polled condition. However, horned cattle can never carry a polled gene.

# UNDERSTANDING EBVS

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

**Gestation Length EBV:** ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

**Birth Weight EBV:** indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

**Calving Ease Direct EBV:** indicates the influence of the sire on calving ease. Sires with positive EBVs for calving ease will increase calving ease and sires with negative EBVs will decrease calving ease.

**Calving Ease Daughters EBV:** ranks sires for the ease with which their daughters will calve.

**Milk EBV:** an important component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

**200, 400 & 600 Day Weight EBVs:** give us an estimation of the animal's genetic potential for growth.

**Carcass Weight EBV:** ranks animals for carcass weight.

**Eye Muscle Area (EMA) EBV:** ranks animals for eye muscle area measured at the 12th rib on a 300kg carcase.

**Rib Fat EBV:** ranks animals for rib fat depth at the 12th rib on a 300kg carcase.

**Rump fat EBV:** ranks animals for fat depth at the p\* site on the rump on a 300kg carcase.

**Retail Beef Yield Percent (RBY%):** ranks animals for the yield of retail beef cuts from a 300kg carcase.

**Intra Muscular Fat Percent (IMF%):** ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcase.

**Scrotal Size EBV:** indicates whether the bull will produce sons with above average or below average scrotal sizes.

**Docility EBV:** is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

## COMPARING EBVS

The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below

AVERAGE EBVs for 2013 BORN LIMOUSIN CALVES

Gest	B. Wt.	CEdir	CEDtrs	Milk	200 Wt	400 Wt	600 Wt
-1.5	1.5	0.4	0.7	5	17	28	39
Carc. Wt	EMA	Rib Fat	Rump Fat	RBY	IMF%	Scrotal	Docility
25	1.3	0	-0.2	0.6	-0.1	0.8	33

## ACCURACIES

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analyzed for that animal and its relatives.

## MID PARENT EBVS

Where MP is shown for the accuracy of an EBV it is a mid parent value. EBVs shown for embryo lots are mid parent values.

## DISCLAIMER

*The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.*

**Lot 1 Warrawindi Jailbreak J78** Jailbreak is an outstanding outcross, polled herd sire. Our junior herd sire for two seasons with progeny on the ground dominating the warrawindi calf crop. He was used over heifers with no calving problems. Sired by the Canadian outcross sire CJSL Time Traveller. Structurally correct for such a large framed bull. He's big boned with great feet. Jailbreak fits in the top 1% for 400 day growth and top 5% for 200 and 600 day growth, EMA, Scrotal, Milk and retail beef yield.

**Lot 28 Warrawindi Lady Titanium L33** First of the Titanium Lady's to be offered in Australia and they are as good as they come. Titanium supplies low birth weight, great growth and carcase with the best docility that we have ever seen in the Limousin breed and this is what Lady Titanium is all about.

**Lot 29 Warrawindi Lady Lazer L37** Ouch, I don't really want to part with this heifer but got out voted, she must go to a good home. Lady lazer is out of a very classy show female and I think Titanium progeny will impress the best of judges. K37 is one of the pick females of this drop, she has major show potential and major breeding potential.

**Lot 30 Warrawindi Lilly L32** Here is a story, until writing this description I didn't realise this female was on offer, we pick the best 12 out of 50 heifers and we are offering half of them. Lilly's dam is a brilliant Moonwalker daughter whose easy doing has calving ease, milk and docility. If the Limousin breed had a fertility EBV Shalone Nobel Prize would be at the top.

**Lot 31 Warrawindi Lucky Charm L55** We had to offer one homo polled female, and this is it. Lucky charm has so much to offer. Her dam is a classy, homo polled cow with a perfect udder. Three half-brothers of Lucky Charm averaged \$7000 at last years bull sale. She's full of muscle and milk with ease of calving and a sweet personality.
