WELCOME

The bull selling season is quickly coming upon us and this years draft of bulls is one of the most outstanding line up we have produced yet. We are thrilled to be able to offer 12 of our top bulls at our on property field day on Monday the 8th of February, 2021.

We take a lot of pride in producing the very best bulls for the industry that allows all clients the chance to purchase the right bull for their program with the help of our team. Whatever your program, whether it's black or red, high yielding or early maturing, we have the bull to suit your cows.

Our stud numbers have decreased over the past couple of years due to purchasing two new sheep studs. Although our numbers have decreased our quality has heightened, with the best females staying in the herd to breed elite and the most profitable stock we can.

12 of our leading bull will be offered at the on property field day, with bloodlines of the well known and respected legend Morrisvale Kept Secret and Mandayen Kong. All bulls are polled with a handful being homozygous polled.

Come along to our field day on Monday the 8th of February and catch up with the Warrawindi team. Nibbles and beverages supplied.

SALE INFORMATION

SA BEEF FIELD DAYS - Monday, 8th of February, 2021 at Warrawindi Farms, 1371 Casterton Road, Penola, South Australia from 9am to 5pm. Refreshments and nibbles provided throughout the day. All bulls have been semen tested and vaccinated with 7in1, B12 and Multimin. J-BAS 6. PIC-SA160047.

OUR GUARANTEE - All animals come with a 12 month guarantee. If the bull proves to be infertile or incapable of natural service, providing the problem is not caused by injury incurred since taking delivery. Any claims must be accompanied by veterinary certificate.

UNDERSTANDING EBVS

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits.

ADVERAGE EBVs for 2018 BORN LIMOUSIN CALVES

BWT	Milk	200Wt	400Wt	600Wt	Serotal	CarWt	EMA	Rib fat	RBY	Doc
+1.5	+7	+20	+33	+45	+1.0	+29	+1.6	+0.0	+0.7	+40

Birth Weight EBV: this EBV indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

Milk EBV: an important component of fast growth to weaning is the dam's maternal performance. A bull with high milk EBV should produce daughters that milk well.

Accuracies: They are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animals EBVs.

200, 400 & 600 Day Weight EBVs: these EBVs give us an estimation of the animals genetic potential for growth to the various ages.

Docility EBV: the docility EBV is expressed as they increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Postivive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs: The EBVs for Limousins cannot be compared to other breeds. They should be compared with the current average EBV for the Limousin breed shown.
